Chairman Message

The year 2024 was pivotal for the Egyptian economy, unfolding amid global challenges stemming from geopolitical tensions and market volatility. Despite these headwinds, The Egyptian Exchange (EGX) reinforced its position as a key driver of sustainable development and economic growth.

Throughout the year, EGX achieved record-breaking performance. Market capitalization reached an all-time high of EGP 2.17 trillion – an increase of EGP 450 billion year-on-year. Trading activity also surged, with total securities turnover reaching EGP 14.3 trillion, reflecting strong liquidity and heightened investor interest. The average daily number of investors exceeded 27,000, marking a 35% increase over 2023 and a remarkable 166% rise compared to 2021–2022 average.

All EGX indices recorded strong gains in 2024. The main benchmark EGX30 index rose 19.47% YTD, EGX70 EWI surged by 48.8%, EGX100 EWI increased 42.3%, and EGX33 Sharia Index gained 36.6%. A notable milestone was the launch of a Sharia-compliant EGX33 index on June 12, which received a positive market response and attracted interest from three fund managers.

Efforts to enhance market appeal for both large and emerging companies continued to gain momentum, with notable progress in government's IPO programs aimed at broadening ownership and supporting economic growth. These initiatives reaffirmed EGX's role as both a platform for returns and a catalyst for building a more resilient and sustainable economy.

Guided by its development strategy, the EGX achieved several key milestones in 2024. These included enhancement to trading mechanisms, the introduction of new financial instruments, and improvements in transparency, disclosure, and governance practices aligned with international standards. These advancements improved overall market efficiency and helped attract both local and international investors.

Listings activity experienced significant growth in 2024, with 11 new companies and one spin-off joining the market - a total of 12 listings, marking the highest annual increase in several years. The year witnessed the first bank listing in nearly two decades, the United Bank, which notably achieved the fastest post allocation surplus

Annual Report 2024

refund. Additionally, five companies successfully graduated from the SME platform to the main market, highlighting the SME platform's vital role as a growth incubator.

In 2024, trading regulations were enhanced to boost liquidity and deepen the market. The EGX restructured its market segmentation, aligning listed categories with index compositions to eliminate overlap and enhance clarity. Margin trading was expanded to include a broader range of instruments, and T+0 and T+1 settlement cycles were unified. The tick size was revised to be calculated as a percentage of the closing price. Collectively, these reforms significantly increased trading activity across a wide range of stocks.

In 2024, the EGX advanced its technological infrastructure by partnering with a leading global trading system provider and initiating feature testing for a fully integrated platform. This cutting-edge system is designed to support trading across all financial instruments, including derivatives and carbon credits. Enhancements also included upgrading the private offerings transaction system, streamlining capital increase subscriptions, and digitizing client onboarding and GDR processes - marking a significant step forward in market efficiency and accessibility.

In 2024, the EGX reinforced its leadership in sustainability, building on its long-standing efforts since the launch of its Sustainability Index in 2010. It remained actively engaged in global and regional initiatives, promoting sustainability among market participants. EGX published its Sustainability Report for 2022–2023, with the 2024 edition currently in progress.

The carbon credit trading system, launched in early 2024, underscores the EGX's agility in responding to market dynamics. Developed locally by the company "Egypt for Information Dissemination (EGID)" and Taswyaat Clearing Services (Taswyaat), the system's trading and settlement rules were finalized, with operations scheduled to commence in August 2024.

These developments build on the sustained progress driven by successive EGX leadership teams under Egypt's Vision 2030. Despite significant internal and external challenges, they reflect EGX's resilience and responsiveness to global trends, reinforcing its capacity to support growth, absorb increased offerings, and scale transaction volumes. This positions the EGX to further expand market capitalization, attract foreign investment, and improve its international classification.

Amid ongoing internal and external challenges - particularly the looming global trade tensions and its impact on emerging markets - there is a pressing need to strengthen the capital market. This requires a unified effort

to prioritize decisive action, ensure the success of the offerings program, attract foreign investment, enhance operational rules, streamline the listing process, and provide targeted investment incentives for EGX-listed companies.

As we enter a new year, we remain optimistic and firmly committed to advancing our development strategies. These **strategies** will focus on attracting sustainability- and innovation- led investments, increasing company listings and offerings, introducing new financial instruments, and further enhancing market efficiency and trading infrastructure.

In conclusion, I extend my deep appreciation for the continued collaboration with government entities and the Financial Regulatory Authority in supporting the EGX's initiatives and priorities. I extend sincere thanks to the employees of The Egyptian Exchange, its Board of Directors, member firms, listed companies, and media professionals whose efforts contributed to the market's progress throughout the year. To all our partners in success: let us move forward with determination and shared purpose to achieve new milestones serving the Egyptian economy and solidify the EGX's position on the global stage.

We ask God Almighty for success and guidance, and I conclude my speech with this noble Qur'anic verse:

In the Name of Allah, the Gracious, the Merciful "and that there is not for man except that (good) for which he strives"

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

وَأَنَّ لِلْإِنْسَانِ إِلَّا مَا سَعَى وَأَنَّ سَعْيَهُ سَوْفَ يُرَى

Annual Report 2024

2024 Highlights: Historic Performance and Record Achievements

Performance and Trading Statistics

Global Economic Outlook and Its Implications for Egypt

The global economy, alongside emerging markets such as Egypt, is navigating a transformative period marked by both challenges and opportunities. Egypt's outlook is improving, supported by reform measures aimed at attracting foreign capital and boosting investment. These include tax incentives, stable tax and flexible monetary policies, enhanced governance, and a balanced environment for public and private sectors. The government's divestment program is expected to further empower the private sector, while targeted support continues to strengthen industrial capacity and export growth.

In 2024, global monetary tightening remained in effect as central banks worked to curb inflationary pressures driven by ongoing challenges, notably the Russia-Ukraine conflict and escalating tensions in the Middle East.

Egypt adopted a balanced monetary policy to attract foreign capital and support economic growth, anchored by a flexible exchange rate regime. Periodic interest rate adjustments addressed inflationary pressures. In addition, enhanced transparency and communication helped manage inflationary expectations and strengthen market confidence.

This positive shift in Egypt's investment climate has significantly increased its appeal to a diverse range of investors. In March 2024, the government announced a \$35 billion investment deal for the Ras El-Hikma project. Additionally, the International Monetary Fund approved an increase in its financing program for Egypt from \$3 billion to \$8 billion, alongside over \$14 billion in additional financing from the European Union and World Bank. These developments align with the government's goal to secure \$15 billion in investments for green hydrogen production projects from 2025 to 2030, with several projects set to begin in the first half of 2025.

Egypt is poised for an increase in foreign direct investment, bolstered by the recent upgrade of its credit rating by Fitch with a positive outlook, **alongside** to favorable reviews from other rating agencies. Notably, Morgan Stanley has removed special treatment for Egyptian stocks, and FTSE Russell has retained Egypt in the "secondary emerging markets" category. These developments, coupled with the government's focus on privatization and expanding the public asset base, are expected to drive further investment. The government aims to increase the private sector's contribution to GDP to 65% by implementing the State Ownership Policy, which involves the state exiting 62 economic sectors in favor of private ownership. The government's offerings

program has also resumed, highlighted by the sale of 30% of United Bank shares, which saw significant investor interest - six times oversubscribed in the private offering and 59 times oversubscribed in the public offering.

International financial institutions forecast a gradual improvement in Egypt's economic performance in the coming years. The World Bank and International Monetary Fund (IMF) Forecast GDP growth of 3.5% in 2025 and 4.2% in 2026, compared to an estimated 2.5% in 2024.

While some advanced economies have begun adopting monetary easing policies, such as interest rates cuts, to enhance the global investment climate and stimulate foreign investment in emerging markets like Egypt, new challenges have emerged the current US administration's trade policies and changes in US monetary pose potential risks to financial stability and global investment flows. As emerging markets prepare to navigate these shifts, key influences such as US interest rate reductions, foreign investment stimulation, and supply chain restructuring will significantly shape the economy in the near future.

Annual Report 2024

EGX30 in 2024: Performance & Key Events

Annual Report 2024

Performance of EGX market indices

The EGX30, the main index of the Egyptian Exchange, reached a historic peak of 33,382.51 points at the close of the trading session on March 11, 2024. After experiencing a brief decline in April, it rebounded to close the year with a 19.47% annual growth. Similarly, the EGX70 EWI and EGX100 EWI indices also reached historic highs in 2024, reflecting robust performance across the broader market

Annual Report 2024

The following charts illustrate the development of these indices throughout their history: The EGX33 Shariah Index (with a base date of January 1, 2022) also posted a notable annual return of 36.62% and a return of 21.46% since its launch on June 12, 2024. The index includes the most Sharia-compliant companies among the

most active EGX-listed companies.

The EGX70 EWI led the Egyptian Exchange indices with a growth of 48.77%, followed by the S&P/EGX ESG index, which tracks companies most committed to governance, environmental, and social responsibility standards. The EGX100 EWI, the 100 most active stocks, and the EGX33 Sharia Index also delivered strong performances. Additionally, the EGX30 TR index, which accounts for the reinvestment of cash dividends, achieved an annual return of 23.42%, while the EGX30 Capped index posted a return of 22.02%.

All sectoral indices saw growth, except for the basic resources sector. The industrial goods, services and automobiles sector topped the list with an annual return of 136.62%, followed by the real estate sector at 79.89% and textiles and durable goods which posted a return of 66.77%. In contrast, the basic resources sector experienced a decline of 16.35%.

Annual Report 2024

EGX vs. Global & Regional Markets

By the end of 2024, the Egyptian Exchange (EGX) indices outperformed many global market benchmarks. The EGX70 EWI, EGX100 EWI, and EGX30 closed the year with returns of 48.8%, 42.3%, and 19.5%, respectively. Additionally, the EGX33 Sharia Index delivered an annual return of 36.6%, further solidifying the EGX's robust performance relative to global market trends.

Over the past five years, (2020 to 2024), the EGX indices achieved exceptional cumulative returns. The EGX70 EWI led the way with an impressive cumulative return of 542.7%, followed by the EGX100 EWI at 413.5%, and the EGX30 with a cumulative return of 113.0%.

Trading Activity

1. Trading Values for Listed and Unlisted Securities

In 2024, the EGX achieved a record with the total trading value of all securities EGP 14.3 trillion, with treasury bills accounting for the largest portion. Additionally, the trading value of listed stocks surpassed EGP 1 trillion for the first time, marking a remarkable 65% increase from the previous year.

Average daily trading value of Equities (incl. trades) on a monthly basis during 2024 compared to the previous two years

Source: EGX

Annual Report 2024

The year 2024 witnessed a significant increase in average daily trading values on a monthly basis compared to all previous years. February 2024 recorded the highest average daily trading value for listed stocks (including deals), reaching EGP 6.3 billion. Additionally, listed stocks (including deals) also achieved their highest daily trading value of EGP 24.5 billion on July 10, 2024.

Average daily trading values on a monthly basis during 2024

Continuing the market's outstanding performance during the last quarter of 2023, listed stocks (including deals) achieved the highest daily average trading value in the first quarter of 2024, reaching EGP 5.5 billion. In the second quarter, the daily average stood at EGP 3.6 billion, while in the second half of the year, the daily average trading value returned to exceed the EGP 4 billion mark.

Source: EGX

On the other hand, the average daily trading volume for treasury bills peaked during the first quarter of 2024, before declining in the second quarter and then rising again during the second half of the year. The average daily trading volume for treasury bonds also followed a similar trend, rising during the first quarter before slightly declining in the second quarter and then increasing again, reaching a peak in the fourth quarter with an

Annual Report 2024

average of EGP 7.9 billion. Conversely, the average daily trading value for unlisted stocks declined during the first half of 2024 before rising in the second half of the year, supported by increased trading volumes in August and December, when the average daily trading volume exceeded EGP 1 billion.

2- Trading volumes for listed and unlisted securities

The year 2024 marked a new all – time high in total trading volumes, reaching 267 billion securities, with listed stocks accounting for the majority. Listed stocks recorded a total trading volume of 260 billion securities, reflecting a 26% increase compared to the previous year.

Annual Report 2024

Number of New Investors

Increase of the number of coded investors in the market during 2024

In 2024, the number of new investors reached approximately 230,500, with retail investors making up 228,500, compared to around 381,800 investor in 2023. Meanwhile, the number of new institutional investors in 2024 stood at approximately 2,000, down from 3,800 in 2023. A significant increase in new investors during 2023 can be largely be attributed to the introduction of treasury bills trading on September 23, 2023, as well as the adoption of advanced technologies, including mobile applications, by some brokerage firms.

Market capitalization of companies was calculated as follows:

- Market cap of listed companies (IPO) = Offering price × number of listed shares
- Market cap of listed companies (Direct trading) = First trading day reference price × number of outstanding shares
- Market cap of de-merged companies = First trading day reference price × number of listed shares
- Market cap of delisted companies = Last closing price before delisting × number of listed shares

IPOs

Two companies had IPOs in 2024, raising a total of EGP 5.6 billion:

- **Act Financial Consulting:** EGP 1.04 billion (EGP 870 million in private placement, EGP 174 million in public offering).
- **United Bank:** EGP 4.57B (EGP 4.34B private placement, EGP 228.53M public offering).

IPOs historical evolution since 2015

Source: EGX

This underscores the significance of new offerings - particularly large-scale government offerings - as key drivers of market momentum, as seen in regional peer markets.

Annual Report 2024

Evolution of Capital Increases

In 2024, capital increases in the market totaled EGP 25.6 billion, including EGP 14.8 billion in cash increases. This represents a decline from EGP 37 billion in 2023, which included an EGP 18.5 billion merger between the Egyptian Nitrogen Products Company and MOPCO.

Non-cash capital increases reached EGP 10.8 billion in 2024, down from EGP 12.9 billion in 2023

2024 EGX Strategy: Key Achievements

First Pillar: Overall Market Structure

This pillar focuses on enhancing the legislative and regulatory framework of the Egyptian Exchange (EGX), which is crucial for achieving the goals of the remaining pillars.

In 2024, the following nine targets were successfully achieved:

1. The period for existing shareholders' priority to subscribe for increased shares was reduced to a minimum of 15 days, starting from the opening date of subscription, down from the previous 30-day period. This reduction aims to streamline procedural timelines and positively impact share trading, in coordination with the Financial Regulatory Authority.

Prime Ministerial Resolution No. 2423 of 2024 was issued and published in Official Gazette No. 30 (A) on July 28, 2024. The resolution introduced amendments to certain provisions of the Executive Regulations of the Capital Market Law, including Article 31.

2. Proposals were put forward by the joint committee between the EGX and the General Authority for Investment and Free Zones (GAFI) to amend certain legislative articles. These amendments aimed to reduce procedural deadlines for capital increases, board meetings, and ordinary and extraordinary general assemblies in joint-stock companies. Additionally, proposals were made to amend legislative articles concerning the conversion of partnerships and sole proprietorships into joint-stock companies. The committee also discussed the implementation of a Fast Track process for EGX-listed companies.

In 2024, representative offices collaborated with 32 listed companies and GAFI to expedite their businesses. They served around 7,600 clients and issued approximately 2,200 statements.

3. The procedures for trading shares in healthcare and pharmaceutical companies have been streamlined. For acquisitions below 25%, only a notification is required.. However, for acquisitions exceeding 25%, the deals execution follows the approvals from the relevant authorities.

4. An enhanced, standalone version of the EGX Operations System (OPR) was developed to support capital increase subscriptions in the primary market by enabling brokerage firms to collect client orders and forward them to the receiving bank for allotment.

This was implemented following an EGX study aimed at achieving strategic goals by amending regulatory procedures and upgrading electronic systems, particularly the OPR one. A new system was developed to handle initial subscription requests for Act Financial Consulting Company's capital increase.

5. A modified, standalone version of the EGX's OPR system was launched to receive private placement and subscription orders, enabling all brokerage firms to register such orders.

The first private placement using the updated OPR system was carried out in July 2024 for Act Financial, allowing all brokerage firms to submit orders. This followed a procedural review and the development of an independent version of the system to receive initial capital increase subscriptions.

As part of ongoing market framework enhancements, the OPR system was upgraded to enable all brokerage firms to register private placement orders, helping ensure the success of these offerings.

The upgrade also enabled private placement orders to be entered within a price range, allowing the offering manager to apply a

price-building mechanism. This was used in the United Bank private placement.

6. In coordination with the Financial Regulatory Authority (FRA), membership rules were amended to align with the capital market's rapid development and to enhance companies' risk management capabilities, as follows:

- Membership to include companies engaged in activities related to securities trading on the EGX, such as portfolio and fund management firms.
- Adding brokerage activities in futures contracts and carbon credits trading.

- Proposals were submitted to the FRA to amend financial solvency rules for brokerage firms and to update margin trading regulations.

7. The listing rules, membership rules, and EGX strategy are now available in both Arabic and English on the EGX website.

This ensures information is accessible to all local and foreign investors, enhancing transparency and boosting market competitiveness.

Membership Rules in Arabic

Membership Rules in English

Listing & Delisting Rules in Arabic and English

8. In coordination with the FRA, rules for electing members to the EGX Board of Directors were amended per Prime Ministerial Decree No. 4364 of 2024. Key changes include limiting candidacy and electoral participation to EGX members.

9. In line with Target No. 4 of the EGX Strategy, we continue engaging with funds and institutions to boost their investments in the capital market, particularly after the FRA's decision mandating private insurance funds to invest at least 5% of their assets in open-ended equity investment funds.

Second Pillar: IPOs

The EGX prioritizes attracting companies for listing. In 2024, the following objectives were achieved for this pillar:

1. In March 2024, a joint study with GAFI was conducted on linking tax and investment incentives to EGX-listed companies, especially these companies that export a portion of their production, produce import-substituting products, or are branches of international companies importing products to Egypt. The aim is to encourage local industry development and establish Egypt as a regional manufacturing and export hub.

Regarding capital gains tax:

In coordination with the FRA and relevant authorities, and as announced by the Cabinet on May 1, 2024, the tax due from the issuance of Law No. 30 of 2023 until December 31, 2023 was waived. This had a significant positive impact on the market.

2. All brokerage firms with eligible clients were allowed to put private placement orders, thereby promoting competition and attracting more clients through broader firm participation .

Trading in Act Financial shares began on July 31, 2024.

The ACT Financial Consulting IPO showed strong performance. The public offering tranche was covered about 55 times, with an allotment rate of 1.8%, and the private offering tranche was covered over 20 times. More than 19,000 investors subscribed to the public offering, while 493 subscribed to the private offering, with 203 receiving allotments. A total of 102 brokerage firms participated in the offering.

3. The United Bank's EGP 4.57 billion IPO—the first bank share offering in nearly 20 years—saw surplus funds refunded to investors' accounts the day after the offering.

The private placement was covered 6 times, while the public offering was covered about 59 times, with a 1.7% allotment rate. Trading in the bank's shares began on December 11, 2024.

Third Pillar: Listing at EGX

In coordination with the Financial Regulatory Authority (FRA), a comprehensive review of the listing rules and procedures is currently underway. A new version will merge the rules with their executive regulations to better align with market needs and international best practices, enhance investor protection, simplify processes, and address existing challenges.

1. Since the beginning of 2024, 11 new companies and one split company have been listed—8 in the main market and 4 in the SME market.
2. Five companies moved from the SME market to the main market, reflecting the SME market's role as a transitional phase to prepare companies for main market listing.

2024 recorded the highest number of companies successfully transitioning from the SME market to the main market, as follows:

1. International Company For Fertilizers & Chemicals
2. Lotus For Agricultural Investments And Development
3. M.B Engineering
4. Digitize for Investment And Technology
5. Industrial & Engineering Enterprises Co.

3. As part of EGX's efforts to support listed companies in meeting listing and delisting requirements, a register of investor relations officers was created to strengthen transparency and communication. To date, 290 officers have been registered, with additional candidates currently in training for inclusion.
4. In coordination with the FRA, Article 38 of the listing rules was amended to adopt a more flexible and efficient insider trading framework. Listed companies are now required to notify insiders of blackout periods, thereby easing the burden on brokerage firms and investors while enhancing market efficiency.
5. To enhance the quality and efficiency of the disclosure process, the EGX continues to improve the quality of listed companies' disclosures with standardized forms containing comprehensive data. Key achievements in this area include:

- **Use of Proceeds Form:** this form was developed to clearly show how funds are used and ensure they match the company's prospectus.

- **Business Results Review Form:** this form was developed to compare actual business results with the projected outcomes outlined in the future plans presented by newly listed companies.
- **Asset Revaluation Form:** This form was developed to disclose asset revaluation details in line with Accounting Standard No. 34, including key financial indicators such as net profit and earnings per share before and after the revaluation.

6. Oversight of disclosure processes has been strengthened to ensure full compliance with disclosure and governance requirements. Periodic assessments are conducted to identify challenges faced by listed companies. In cases of significant violations, companies are required to provide explanations of the corrective actions taken and implement board approved internal controls to prevent recurrence.

Fourth Pillar: Development of Trading Rules and Mechanisms

This pillar focuses on enhancing trading mechanisms to support investors in applying strategies aligned with their risk profiles. In 2024, the following achievements were made:

1. **The trading system has been upgraded to create an integrated platform for all securities and financial instruments, including dedicated markets for stocks, bonds, derivatives, and carbon credits, in line with international standards and best practices.**

The new trading system is one of the most advanced globally, designed to enhance the EGX's leadership in trading system development. It supports significantly higher capacities in terms of order, transaction, and client registration, compared to the previous system. The system facilitates trading in stocks, fixed-income instruments, financial derivatives on stocks and indices, and carbon credits, ensuring seamless integration, especially for interconnected products like stocks and their related financial derivatives, such as futures on indices and stocks.

The system also enables connectivity with the exchange's internal systems and all external parties, including brokerage firms, custodians, and clearing and settlement companies. Implementation is ongoing according to a set timeline.

2. **Efforts are underway to update the surveillance system with an integrated solution, tailored to meet current needs and future requirements, in line with the latest international standards and practices.**

3. **The basis for calculating the tick size for stocks was amended to a percentage of the closing price, aimed at boosting market liquidity and trading volumes. Effective August 2024, the tick size was set to three decimal points for stocks where the piaster represents 1% of the closing price (e.g., stocks priced at one pound or less). This change led to increased trading volumes for the concerned stocks (21 companies transitioned from three decimal points to two), thereby enhancing their liquidity.**

The tick size will be periodically reviewed based on market conditions and trading activity, ensuring that it remains tied to a percentage of the security price. This aims to improve market depth and better match supply with demand.

4. The EGX investor registration system was updated to automatically suspend and reactivate dormant codes, centralizing the process for managing dormant code suspensions and reactivations.

5. The registration process for investment fund and foreign companies has been simplified to match regional and global practices. The validity period for foreign institutions' codes has been extended to align with Egyptian institutions. Further updates to the client registration rules are being made in coordination with the FRA.

6. The first phase of digitizing the systems and procedures for Global Depository Receipts (GDRs) has been completed, replacing the manual system to simplify procedures, improve liquidity, and enhance market efficiency.

The second phase of the electronic link between the new automated GDR system and Misr for Central Clearing, Depository and Registry (MCDR) has been completed. This enables automatic transmission of GDR issuance and redemption data to MCDR, allowing for electronic, direct, and automated settlement and transfer of stock balances with the International Depository Bank.

The new Global Depository Receipts (GDRs) system came into effect on April 28, 2024.

The new system has digitized all transfer processes related to GDRs through a unified, automated platform connecting all relevant parties. This has streamlined operations, improved efficiency and service quality, reduced manual errors, and enhanced market liquidity.

7. A comprehensive restructuring of the market was carried out, linking market segments to indices to eliminate overlap between existing markets and lists, as follows:

- **The Most Active Board:** The board includes the constituents of EGX 100 Index, in addition to the Exchange Traded Funds (ETFs) certificates that track one of EGX Indices.
- **Medium Activity Board:** The board includes securities that are neither part of EGX 100 index constituents nor part of the inactive board
- **Inactive Board:** EGX management has the right to include securities on this board that are subject to EGX Chairman Decree No. 92 for the year 2021 concerning List D criteria, the securities of the companies under liquidation, high-risk securities in terms of magnitude and concentration of debt

and high price volatility, as well as securities of companies that have breached listing rules & have not been complied with it.

- **Small and Medium Enterprises (SMEs) Board:** It is divided into two lists:
 - (A) **The “TAMAYUZ” List:** The board includes the constituents of TAMAYUZ Index. Securities on this board are entitled to the Same Day Trading (T+0), (T+1) & Margin Trading and can be accepted as collateral up to 80% of their market value .
 - (B) **The “Nile” list:** includes the rest of securities that are listed in SMEs board. Securities on this board are not entitled to Same Day Trading (T+0), (T+1) or Margin Trading.

8. The reclassification of EGX market segments was implemented in February 2024. Periodic reviews under the new structure have shown an increase in the number of securities eligible for margin trading, along with improved market liquidity and trading activity.

This improvement follows the market reclassification, which expanded margin trading eligibility to include shares of companies listed on the most active board (101 securities), the medium-active board (100 securities), and the distinguished list of the SMEs board.

9. An updated version of the Trading Guide, reflecting all recent developments, was made available in both Arabic and English, with continuous updates. The fifth edition was updated in June 2024, followed by another update in July 2024.

Trading Rules and Procedures Guide in Arabic and English

10. Amendments to the Operations Committee's rules have started to keep pace with market changes and practical experience. The updates include rules for restarting trading in inactive shares, adjusting price limits to help match supply and demand, and setting trading limits for price movements and new listings.

Urgent amendments were made under Resolutions No. 357 and 358 of 2024, adjusting rules for off-market trading, price limit exceptions, and first-day trading. A full revision of the Operations Committee's rules is underway.

11. The criteria for EGX indices, particularly EGX70 and TAMAYUZ, have been reviewed and amended to enhance liquidity of their constituents.

During 2024, the EGX has revised its main index methodologies, aligning with international best practices to ensure the inclusion of highly liquid companies in the index and support ongoing index development.

EGX30 Index: The EGX30 index methodology was updated in January 2024 and implemented in February, raising the required trading days during the review period from 65% to 95%.

EGX70 EWI Index: The EGX70 EWI methodology was updated in January 2024 and implemented in February, raising the required trading days from 65% to 90%. Two new liquidity criteria were introduced, including a minimum average of 0.1% of total daily market traders participating in a stock during the review period.

The second criterion requires that a stock's free-float turnover rate be at least 10% over the past six months, or its average daily trading value must be no less than 0.0005 of the total average daily trading value in the main market.

TAMAYUZ Index for SMEs: In February 2024, the Exchange amended the inclusion and exclusion criteria for the TAMAYUZ Index to better reflect company liquidity, financial performance, and growth potential. A new requirement was added: a company's shares must be traded on at least 70% of trading days during the review period (excluding cross trades), and its turnover ratio for free-floated shares must be at least 10% over the past six months.

Several financial standards have also been revised as follows:

Annual Report 2024

- Companies must have a Compound Annual Growth Rate (CAGR) of at least 10% over the past two years. If the growth rate is positive but below 10%, the company must have revenues equal to at least 50% of equity, as per the latest annual financial statements.
- Companies must demonstrate a positive cumulative equity growth rate over the past two consecutive years.
- Companies with losses over the last three consecutive years are excluded.

In October 2024, the required percentage of trading days for inclusion in the index methodology was increased from 70% to 90%.

In 2024, four contracts were signed with investment funds to enable them to track various EGX indices, including the EGX33 Shariah Index and the EGX100 Index.

Fifth Pillar: New Markets and Financial Instruments

This pillar focuses on introducing new financial markets and instruments to meet investor needs. The following achievements were made in 2024:

1. **The launch of the EGX33 Shariah Index, designed to attract new investor segments and offer a new financial instrument, has been positively embraced by various market participants.**

The EGX33 Sharia Index was launched on June 12, 2024, with its calculation starting from January 1, 2022, at a base value of 1,000 points.

The index serves as an investment tool for investors looking to invest in Sharia-compliant, highly liquid securities. It adheres to Sharia-compliant criteria approved by a committee of financial experts. To meet the needs of market participants, particularly investment fund managers, a maximum weight of 15% per company is set, supporting the development of financial products like index funds.

The index includes 33 companies selected from the EGX100 EWI index, all of which conduct activities that comply with Islamic Sharia principles and are approved by the Sharia Supervisory Committee. It also includes companies that have a Sharia Supervisory Board, provided they meet the liquidity standards set by the Committee as well as all other qualitative criteria applicable to other EGX indices.

The index is tracked by three investment funds, and there has been a notable increase in the number of investment managers aiming to offer financial products that track EGX indices.

2. All necessary steps have been completed for the launch of the voluntary carbon market trading platform.

Since its launch on August 13, 2024, five transactions have been executed, resulting in the issuance of 5,000 certificates.

On February 8, 2024, the EGX Board of Directors approved the draft rules for listing, trading, and settling carbon credits in the African Voluntary Carbon Market. On March 7, 2024, the Financial Regulatory Authority's Board of Directors issued a decision formally approving these rules. .

Accordingly, EGX's subsidiaries - EGID and Taswyaat - have developed trading and settlement systems in line with the finalized rules. Additionally, the EGX's team has launched and continuously updated a dedicated website to reflect the latest developments in the carbon market.

Regulations have been finalized to enable marketing agents to partner with brokerage firms, thereby facilitating the activation of both the supply and demand sides of the market.

In response to growing interest from various stakeholders, EGX is currently focusing on the following initiatives:

- A. A plan is being developed to support and encourage listed companies to issue carbon credits. The EGX is holding preliminary discussions to allow listed companies and carbon credits to be listed on the voluntary carbon market.
- B. The EGX is studying the potential for trading "International Renewable Energy Certificates (IRECs)" in line with international best practices. IRECs are issued for each megawatt-hour of electricity produced from renewable energy and can be purchased by companies aiming to offset their carbon emissions.

To check the market's website and view all the data and regulations

3. The launch of additional indices, including a Low Volatility Index, Shariah-Sustainability Index, and Treasury Bill Index, is currently under consideration.

Sixth Pillar: Promotion, Financial Literacy, Training, and International Relations

First: Promotion and Financial Literacy

1. The historic trading hall is being renovated and transformed into a conference hall and main center for events. It will house the EGX Museum, representing the exchange's history, alongside a branch of the CORBEH Innovation Center, symbolizing the future of financial technology.

On August 5, 2024, Mr. Ahmed El-Sheikh, the EGX Chairman, alongside several ministers and heads of governmental authorities, inaugurated the renovated trading hall in the historic EGX building. The event, coinciding with the centennial celebration of the building, highlighted its significance as one of the oldest stock market buildings in the world, holding both archaeological and symbolic value.

The ceremony was attended by several dignitaries, including Dr. Amr Talaat, Minister of Communications and Information Technology; Dr. Sherif Farouk, Minister of Supply and Internal Trade; Ambassador Dr. Badr Abdel Aati, Minister of Foreign Affairs and Egyptian Expatriates Affairs; Mr. Alaa Farouk, Minister of Agriculture and Land Reclamation; Eng. Mohamed Shimi, Minister of Public Business Sector; Dr. Ibrahim Saber Khalil, Governor of Cairo; Dr. Mohamed Farid Saleh, the FRA Chairman; Mr. Hossam Heiba, CEO of the GAFI; along with heads of agencies, members of the House of Representatives and Senate, and prominent economic figures and businessmen.

2. Efforts to promote financial literacy continued in 2024, with four editions of the "EGX for Development Conference" held in Alexandria, Damietta, Beheira, and El-Sharqia. Around 13 cooperation protocols were signed with Egyptian universities, including Helwan University, Pharos University, Galala University, the German University in Cairo, European Universities in Egypt (EUE), the Alliance of North Upper Egypt Universities, and the American University in Cairo. A protocol was also signed with the Cairo Chamber of Commerce and Industry to support financial literacy initiatives.

EGX at the 55th Cairo International Book Fair, Jan–Feb 2024

The EGX participated in the Cairo International Book Fair for the fifth consecutive year in 2024, featuring member companies and offering innovative content through its pavilion. Educational materials, including the illustrated brochure "Invest Smartly" and "Learn about the EGX," were provided to simplify stock market basics. An interactive seminar on stock market investing was held on January 26, where the EGX Chairman delivered the opening speech. Member companies also took part in a dialogue session to explain investment mechanisms and respond to audience inquiries.

The EGX pavilion attracted significant interest, with around 9,000 visitors exploring investment and cumulative savings mechanisms on the Exchange. Additionally, EGX's social media platforms recorded approximately 6,000 visits during the book fair period.

The EGX maintained a strong social media presence to engage effectively with its audience, particularly youth. It launched series of book fair-themed initiatives, including coverage of the fair's opening attended by the Prime Minister. Awareness videos were also released, covering topics such as investment fundamentals, investor types, investor registration, and excerpts from educational booklets "Invest Smartly" and "Learn about the EGX."

EGX for Development Conferences in 2024

The EGX expanded its development conferences in 2024, under the patronage of Prime Minister Dr. Mostafa Madbouly. These conferences, held across several governorates, aligning with national efforts to achieve economic and social development goals by supporting companies—particularly SMEs—through improved access to capital market financing. The initiative also aims to raise public awareness, particularly among youth, about the benefits and basics of investing in capital markets and to support their future planning.

During 2024, 4 editions of the EGX for Development Conference were organized, as follows:

The sixth edition of the "EGX for Development" conference in Alexandria Governorate, February 27, 2024

The conference was attended by Dr. Ahmed Zayed, President of the Bibliotheca Alexandrina, along with numerous university professors from various fields and hundreds of young people and university students. As part of the event, EGX Chairman Mr. Ahmed El-Sheikh met with members of the Alexandria Chamber of

Commerce Board and several local businessmen.

The seventh edition of the "EGX for Development" conference will be held in Damietta Governorate on October 20, 2024.

Dr. Ayman El-Shehabi, Governor of Damietta, and Mr. Ahmed El-Sheikh, EGX Chairman, inaugurated the "EGX for Development Conference," with the attendance of Dr. Hamdan Rabie, President of Damietta University, Dr. El-Saeed Abdel Hadi, President of Horus University, and Mr. Mohamed Fayed, Chairman of the

Damietta Chamber of Commerce. During the conference, discussions were held on fostering cooperation to raise awareness about the benefits of listing and investing in the EGX within the local business community.

On November 17, 2024, an introductory seminar was held for accountants and auditors from companies in Damietta Governorate at the Chamber of Commerce headquarters. The seminar focused on the benefits of converting certain businesses into joint-stock companies eligible for listing on the EGX, emphasizing its role in sustaining and fostering growth for these companies.

The eighth edition of the "EGX for Development" conference in Beheira Governorate, November 18, 2024

Beheira Governorate hosted the 8th edition of the "EGX for Development" conference on November 18, 2024, attended by Beheira Governor Dr. Jacqueline Azar, EGX Chairman Mr. Ahmed El-Sheikh, and Dr. Elhamy Trabies, President of Damanhour University. Held at the Damanhour Cultural Complex, the event saw participation from businessmen, university deans and professors, as well as a large number of students.

The ninth edition of the "EGX for Development" conference in El-Sharqia Governorate, November 20, 2024

El-Sharqia Governorate hosted the ninth edition of the "EGX for Development" conference, attended by the Governor of Sharqia, Eng. Hazem El-Ashmouni, and Mr. Ahmed El-Sheikh. The conference was held at the El-Sharqia Governorate headquarters, was attended by local businessmen and a large number of university students.

Annual Report 2024

Memoranda of Understanding in 2024

As part of its commitment to promoting investment awareness and financial literacy among university students, the EGX signed memoranda of understanding with 14 universities in 2024, as well as with the Egyptian Commercial Service (ECS) and the Cairo Chamber of Commerce.

Training & Educational Programs for Students in 2024

EGX organized a series of training programs and workshops to promote financial literacy, raise awareness of savings and investment practices, and introduce stock market fundamentals to university and school students.

As part of this initiative, the following activities were conducted as part of this initiative:

- Nineteen ambassadors were trained through the EGX's Training of Trainers (TOT) program, targeting students specializing in investment and finance. The program equips participants to conduct training sessions that promote investment awareness among pre-university students.
- Over 350 high school students took part in an educational program featuring interactive games and activities aimed at simplifying key concepts related to stock market investing.

- The EGX organized a series of investment awareness sessions for social media influencers, with three lectures conducted that attracted over 1,200 participants. The sessions covered the basics of investment.
- Over 6,000 Egyptian university students were trained on the basics of stock market investing through programs held on university campuses or at the EGX premises.

In 2024, the EGX launched a new initiative with a one- to two-week on-campus presence at selected universities. Supported by various market stakeholders, including brokerage firms, the program aimed to enhance financial literacy. A dedicated EGX pavilion was set up at 11 prominent universities, serving as an information and engagement hub for students.

EGX Advertising Campaign (March-April 2024)

In March and April 2024, EGX launched a Ramadan-themed social media campaign targeting younger investors. Using a dramatic long-form advertisement and short video clips, the campaign garnered around one million views, greatly increasing EGX visibility among the target group.

Other events in 2024

The launch of the second Financial and Digital Inclusion Summit for Youth

The second annual Financial and Digital Inclusion Summit for Youth, themed 'Generation 2030,' was launched at the Olympic Center in Maadi. The event was attended by Dr. Ashraf Sobhi, Minister of Youth and Sports; Dr. Mohamed Farid, FRA Chairman; and Mr. Ahmed El-Sheikh, EGX

Annual Report 2024

Chairman, along with key figures from the Ministry, media, and related institutions.

EGX Chairman Delivers Opening Remarks at the “Portfolio Egypt 2024” Forum

At the Portfolio Egypt 2024 Forum, themed "Arab Stock Exchanges: Competition or Integration?" EGX Chairman Mr. Ahmed El-Sheikh delivered the opening remarks. He also participated in a panel discussion titled "Opportunities for Integration and Bridging Gaps," alongside leaders from the Abu Dhabi, Qatar, and Jordan stock exchanges, discussing strategies to advance regional financial market integration.

EGX Chairman Participates in the Third Cybersecurity Conference

Mr. Ahmed El-Sheikh, EGX Chairman, participated in the Third Information Security and Cybersecurity Conference, delivering a keynote speech that highlighted the EGX's comprehensive cybersecurity strategy.

He emphasized the link between the EGX's growth and its increasing digital reliance, underscoring the need to address rising cybersecurity risks and ensure data integrity.

EGX Chairman Participates in Annual Summit of Capital Markets

Mr. Ahmed El-Sheikh, EGX Chairman, delivered the opening speech at the Annual Summit of Capital Markets,

themed "Structural Reforms... Sustaining Development." He highlighted the EGX's 140-year legacy in supporting national economic growth and reaffirmed its commitment to advancing this role in line with the Egyptian state's strategic vision.

EGX Chairman Participates in the Businesswomen of Egypt 21 Conference

Mr. Ahmed El-Sheikh, EGX Chairman, participated in the opening session of the Businesswomen of Egypt 21 Conference, themed 'Exploring Future Success Strategies'. The event focused on attracting SME investment and fostering international collaboration among businesswomen. EGX Vice Chairman Ms. Heba El-Seirafi also

attended. In his remarks, Mr. El-Sheikh highlighted the EGX's key role in supporting economic sectors by offering diverse financing tools—including equity and debt instruments—critical for business expansion and enhance deployment of resources.

EGX Chairman participates in the Canada Egypt Business Council

Mr. Ahmed El-Sheikh, EGX Chairman, was the keynote speaker at a panel discussion hosted by the Canada Egypt Business Council and the Egyptian Business Council for International Cooperation. The discussion centered on the EGX's economic role, listing benefits, and guidance on investing in the market.

Launching the "EGX Dialogue Forum" to Foster Community Engagement and Gather Insights from Market Participants

Scan to view
EGX Dialogue
Forum

As part of its commitment to social engagement, EGX launched the "EGX Dialogue Forum" on its website. This platform enables stakeholders to submit proposals and share feedback on ongoing discussions via online forms, aiming to enhance decision-making through broader community participation.

Second: Training

3. Training 439 Participants from market stakeholders through programs organized by the Financial Services Institute (FSI) of the Financial Regulatory Authority

Recognizing human capital as a key driver of the capital market, the EGX prioritizes professional development through targeted training programs. In 2024, the EGX conducted several training initiatives for internal staff and listed companies, including nine programs held in partnership with various organizations, benefiting 105 EGX employees.

The EGX conducted training programs for 252 participants, as follows:

No.	Program Title	No. of attendees	Target Group	Training Institution
1	Principles of Trading Debt Instruments and Training on Government Financial Instruments Trading (GFIT) System	15	Experts from Brokerage Firms & Primary/Non-Primary Dealers	Egyptian Central Securities Depository (ECSD)
2	Trading in the African Voluntary Carbon Market and Carbon Credits	81	EGX Member Brokerage Firms	EGID, Taswyat
3	CETA Diploma Program in Collaboration with Egyptian Society of Technical Analysts	70	Interested Parties	Egyptian Society of Technical Analysts
4	Hands-On Training for University Students	18	University Students	EGX Training Center
	"Introduction to Financial Markets" Program	68		

The EGX also collaborated with the FRA's FSI to provide training to 187 professionals from listed companies through the following programs:

No.	Program Title	No. of attendees	Target Group
5	EGX 4th Batch: Client Account Managers & Trading Operators	25	Client Account Managers & Operations Staff in Brokerage Firms
6	EGX 5th Batch: Client Account Managers & Trading Operators	25	Client Account Managers & Operations Staff in Brokerage Firms
7	Third Batch of the Risk Management Program	25	Brokerage Firm Staff: Account Managers, Operations & Risk Managers
8	1st & 2nd Batches – Managing Directors Training Program	50	Managing Directors
9	Specialized Operations Training and Its Effect on Solvency	25	Margin Trading Specialists in Brokerage Firms
10	Back Office Operations Manager Training	25	Interested Parties
11	X-Stream Automated Trading System Training Program	12	Trading License Applicants

Third: Sustainability

4. The sustainability reports for 2022 and 2023 have been published and are available on the EGX website. Preparation of the 2024 report is currently underway.

Scan to view the 2023 Sustainability Report

Scan to view the 2022 Sustainability Report

In 2024, the EGX actively participated in various sustainability-focused events and training initiatives, as outlined below:

- An introductory seminar was held for listed companies in the six Carbon Border Adjustment Mechanism (CBAM) sectors (fertilizers, iron and steel, cement, aluminum, electricity, and hydrogen). The event featured Ms. Nermin Abu El-Atta, Advisor to the Deputy Prime Minister and Minister of Industry and Transport, who represented Egypt as an observer in the CBAM Expert Committee. The EGX also holds representation in the technical secretariat of the Ministerial Committee for CBAM.
- In 2024 Q1, the EGX actively participated in the regular meeting of the United Nations Sustainable Stock Exchanges (SSE) Initiative, contributing to the review of its activities and providing recommendations.
- The EGX joined two advisory groups of the UN SSE Initiative: one focused on climate transformation plans and the other on SME sustainability guidelines. This collaboration is undertaken in partnership with the International Finance Corporation (IFC).
- To strengthen cooperation and enhance sustainability capacity among listed companies, the EGX held several meetings with representatives of the UN SSE Initiative. As a result, two training courses were conducted:

First: The EGX implemented the new International Sustainability Standards Board (ISSB) sustainability standards in partnership with the IFC and the IFRS Foundation. Listed EGX companies and member companies were invited to participate. As the chair of the African Stock Exchanges Federation's Sustainability Committee, the EGX also extended invitations to all federation member exchanges. Notably, the EGX was among the first exchange worldwide to offer this training.

Second: The "Gender Equality and Capital Markets" training, developed in collaboration with UN Women and Bloomberg, positions the EGX as the first global exchange to offer this program. It has been made available to employees across all EGX departments.

- In 2024 Q2, EGX actively participated in the regular meeting of the UN SSE Initiative, contributing to the review of its activities and offering recommendations.

The EGX also participated in the African Development Bank's inaugural Environmental, Social, and Governance (ESG) Forum in Côte d'Ivoire, where it delivered a technical lecture on the three ESG standards and their growing importance for attracting foreign investment and improving transparency.

The EGX's collaboration with the African Development Bank also aims to establish Africa's first comprehensive ESG disclosure center, promoting sustainability within the continent's financial markets infrastructure.

Fourth: International Relations

5. Reflecting its commitment to knowledge sharing, promoting investment in the Egyptian market, and strengthening its global presence, the EGX maintains active membership in several prominent federations, including the World Federation of Exchanges (WFE), Arab Federation of Capital Markets (AFCM), African Securities Exchanges Association (ASEA), Federation of Euro-Asian Stock Exchanges (FEAS), and the United Nations Sustainable Stock Exchanges Initiative (UN SSE).

EGX's is actively participating in regional events, particularly those organized by the Arab Federation of Capital Markets (AFCM) and was elected to the AFCM Board of Directors for the 2024–2026 term, representing Arab and African countries. Additionally, at the AFCM's annual conference in Doha in April 2024, the EGX received three awards for best annual growth of market capitalization, number of new investors, and market turnover ratio.

The EGX secured three awards at the AFCM annual conference reflecting the joint efforts of the EGX, its member brokerage firms, and other financial institutions operating in the market. These awards are:

1. Best Arab exchange in terms of annual growth of market capitalization
2. Best Arab exchange in terms of the number of new investors (clients)
3. Best Arab exchange in terms of turnover Ratio

The EGX engaged in various events, conferences, training activities, and promotional efforts throughout 2024, as follows :

- Focus Magazine, an affiliate of the WFE, highlighted the EGX's initiatives in financial literacy and climate action, showcasing its efforts.

structures, indices, and sustainability practices.

- The EGX actively participated in the Working Committee meetings and General Assembly of the WFE,

To foster knowledge sharing and bolster its international standing, the EGX presented its successful model of treasury bill trading in the Egyptian secondary market to the FEAS. Additionally, the EGX engaged in bilateral meetings with the stock exchanges of Mauritius, Istanbul, and Rwanda to exchange insights on technology adoption, governance

hosted by the Kuala Lumpur Stock Exchange in November 2024. Additionally, the EGX took part in a panel discussion on the global future of IPOs and listings. The EGX also took part in a panel discussion addressing the role of regulatory bodies and stock exchanges in facilitating and enhancing sustainable financing tools.

- The EGX participated in the Board of Directors meetings, General Assembly, annual conference, and working committees of the ASEA in

Botswana from November 27 to 30, 2024. Additionally, the EGX engaged in discussion panels to present Egyptian market investment opportunities and highlight recent developments. Also participated in a panel discussion on environmental, social and governance (ESG) factors affecting African markets.

- The EGX participated in the annual MEIRA Conference in Abu Dhabi in December 2024, recognizing its importance as a platform for knowledge and expertise exchange among investor relations professionals.
- Through a joint cooperation, the EGID, the technological arm of the EGX, developed the Back Office System and Order Management System for use by participants in the Iraqi market .
- The EGX attended joint technical meetings held by the Ministry of Planning and International Cooperation.
- Following the memorandum of understanding (MoU) between the EGX and the Amman Stock Exchange, several meetings were held to exchange expertise on supporting foreign investment, sustainability, trading oversight, and other mutually relevant technical areas .
- Following the signed MoU, the EGX and Tadawul convened meetings to exchange expertise on derivatives, commodities, and financial culture.
- The EGX held several information exchange meetings with the Abu Dhabi Securities Exchange, Dubai Financial Market, and Qatar Stock Exchange, covering trading and surveillance systems, and other areas of common interest.
- The EGX and the Iraq Stock Exchange signed a MoU to support cooperation and joint coordination.
- Participation in capacity-building training programs for EGX employees in collaboration with international organizations, including the AFCM, the WFE, and the Arab Monetary Fund .

- The EGX actively participated in the quarterly board meetings and general assemblies of international federations

Other international events

Celebrating International Women's Day: EGX Hosts "Ring-the-Bell" for Gender Equality

The EGX organized its tenth annual 'Ring the Bell for Gender Equality' event in collaboration with the IFC, a

member of the World Bank Group, and development partners including the WFE, UN Women, the UN SSE Initiative, and the UN Global Compact Egypt Network. Held annually to coincide with International Women's Day, the event encourages the Egyptian private sector to increase economic opportunities for women.

The Minister of Youth and Sports, EGX Chairman, and the FRA Vice Chairman open the trading session in celebration of Global Investor Week and Financial Literacy

Mr. Ahmed El-Sheikh, EGX Chairman, and Dr. Ashraf Sobhi, Minister of Youth and Sports, inaugurated the EGX trading session as part of the 2024 World Investor Week activities. The inauguration was attended by Mr. Mohamed El Sayyad, Vice Chairman of the FRA, and Ms. Heba El Sayrafi, EGX Vice Chairman, alongside other

EGX executives and public figures.

Seventh Pillar: Financial Technology (Fintech)

This pillar centers on the development of automated systems, a critical component of the comprehensive modernization of the EGX's trading infrastructure. This modernization was carried out by the EGX's internal teams, its technology arm, the EGID, and its clearing and settlement subsidiary, Taswyaat Clearing Services. The most important of these systems include:

1. Voluntary Carbon Market trading system
2. Settlement system for carbon credits.
3. Global Depository Receipts (GDRs) system.
4. To support IPOs, a modified and independent iteration of the OPR system was implemented. This system enables brokerage firms to manage client subscription orders and securely transmit them to the designated bank for the completion of the allocation process .
5. An independent, modified OPR system was developed to receive private placement subscription orders within the price range for the offering manager's book building price mechanism.
6. The customer registration system was updated to automatically activate and deactivate codes .
7. Sustained efforts were directed towards the development and marketing of the back-office system, attendance and voting system for company general assemblies, both of which were created by the EGID, the technological arm of the EGX.

Intellectual property rights for several of these systems have already been obtained, while the registration process for the remaining systems is currently underway.

Work is underway to:

1. Leverage Artificial intelligence (AI) to expedite new customer registration processes for companies utilizing Robotic Process Automation (RPA).
2. Develop the government debt securities trading system with new mechanisms that employ RPA, an AI feature, to expedite automated order listing on the GFIT platform. Plans also include the development of APIs to facilitate data and functional exchange within the GFIT system.

Future Vision

The EGX will continue to pursue the objectives of its Board of Directors' development strategy in 2025, with a focus on the following points:

1. Accelerating the government IPO program to cope with the regional IPO momentum. In addition, the EGX will continue its efforts to bring prominent private sector companies into listing.
2. The sustained implementation and operation of the new trading system, aligned with the agreed-upon schedule with NASDAQ, remains a key focus. This integrated platform supports trading in all financial instruments, including financial derivatives and carbon credits.
3. Ongoing development of the trading surveillance system.
4. Enhancing the quality of listed securities remains a key priority, pursued through improved disclosure practices, greater adherence to listing rules, upskilling investor relations personnel, and the enforcement of corrective and preventive measures to address violations by listed companies.
5. Promoting a diversified market with a spectrum of products to include: carbon credits, renewable energy certificates, financial derivatives, exchange-traded fund (ETF) units and index-tracking funds, particularly those focused on real estate and fractional real estate ownership.
6. Ongoing delivery of programs designed to enhance the competencies of market participants
7. Effective communication and community dialogue with brokerage firms and other market stakeholders will be further enhanced to monitor customer needs for development purposes, alongside maintaining active engagement with relevant international institutions.
